

InHouseUSA Solutions Launches the Client, Broker and Appraiser Mobile App!

We are pleased to announce the launch of our new and improved InHouseUSA Solutions Client, Broker and Appraiser Mobile App, available for download on both Apple and Android platforms, on Wednesday June 15th 2016.

In an effort to help decrease incoming calls and increase efficiency in the market, we are providing Clients and Appraisers with a new FREE Mobile App. The Mobile App contains functions that will assist them in their daily tasks such as a handy Dashboard for accessing their requests, a Quick Search function to quickly locate their requests, Push Notifications to notify them instantly of updates, as well as access to their Comments.

Specifically for Appraisers, they will now have the ability to set Appointments and submit Fee Increases at the touch of their fingertips. No longer will they need access to their desktop computer.

InHouseUSA Valuation Mobile App.

Download the App Today!

Use it on your smartphone or tablet!

Only available on Apple and Android systems. Blackberry OS are not supported.

Upon logging in, users are greeted with a Dashboard. This handy feature allows them to access all of their requests easily. All requests are separated into 6 status types. Clicking on a status type will populate all requests for that status type. These status types are further grouped by the following sub-statuses:

New: Includes New, Rejected, Resubmitted

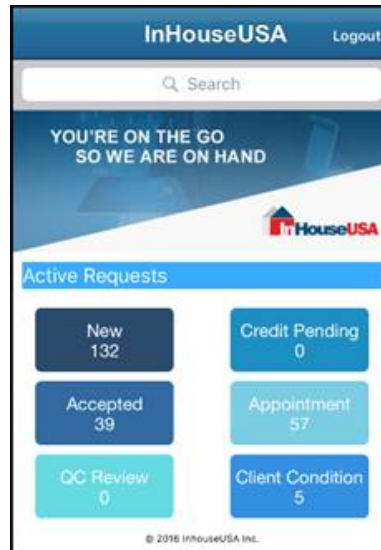

Credit Pending: Includes Credit Pending and Missing Payment

Accepted: Accepted

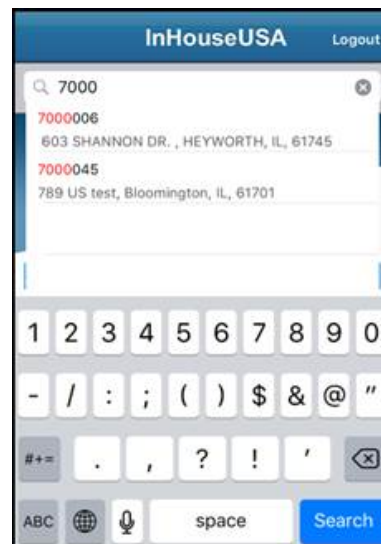

Appointment: Appointment

QC Review: Appraisal Submitted, QC Complete, QC Review, QC Condition, Solutions Under Review, Under Review

Client Condition: Client Condition, Client Condition Pending, Client Condition Under Review, Client Condition, Reviewed, Pending.

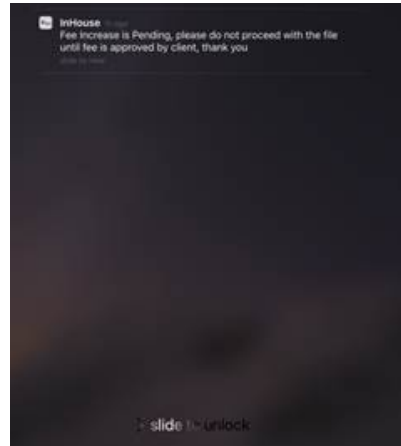

The Quick Search bar allows users to quickly locate any **Solutions Number, Address, Applicant Name and Client Reference Number**. The app will start highlighting and filtering matching results as the user starts typing so requests are easily identified.

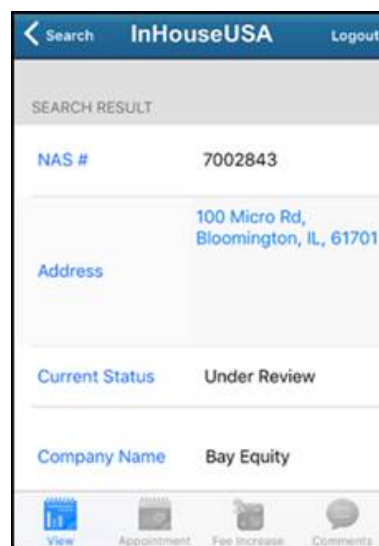

The Push Notifications ensure that users are immediately notified of all updates. Selecting the Push Notification will prompt the user to log in if they are not so already. The Push Notification feature can be toggled on/off in the device's application settings.

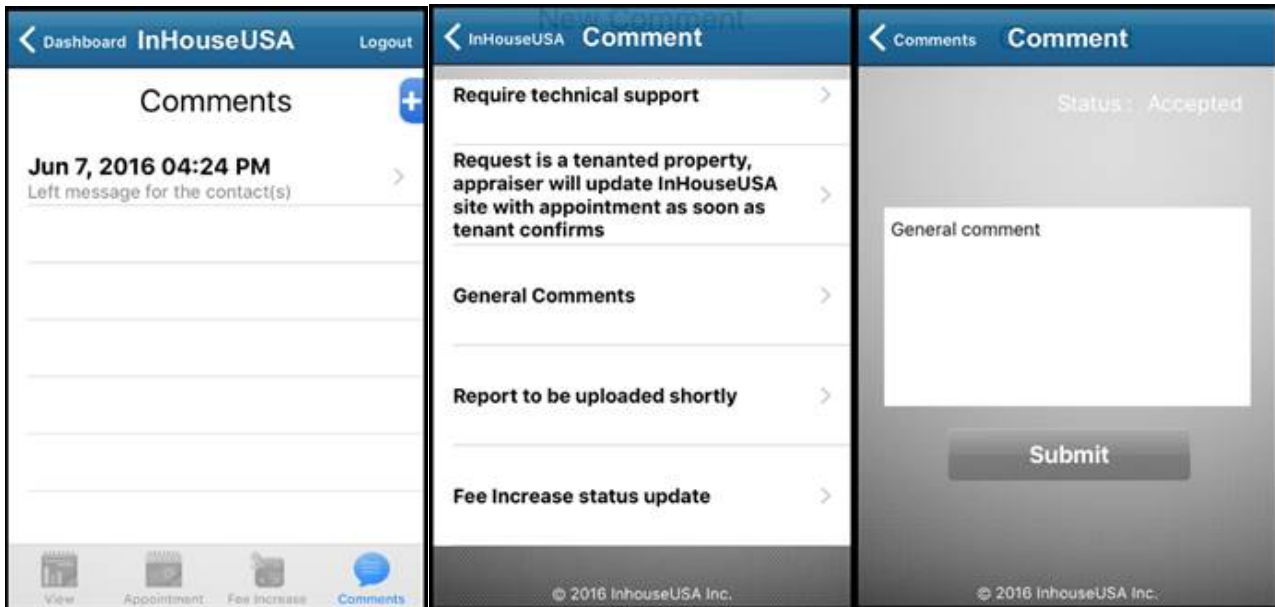

The View tab allows the user to review all details of their assignment. We have also included a time on when an updated is to be expected.

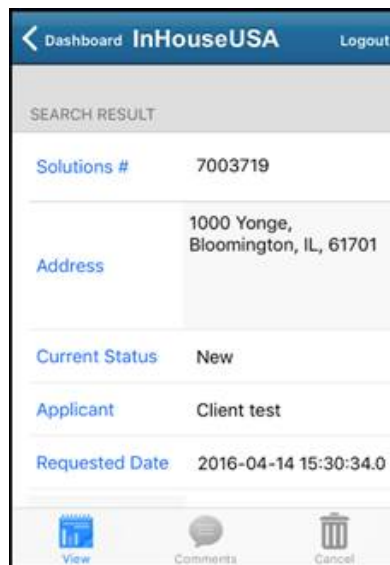

Access to all Comments will promote responsive communications to all parties. The Mobile App provides a free-type box for the Client App while preset comments are available for standard responses for the Appraiser App.

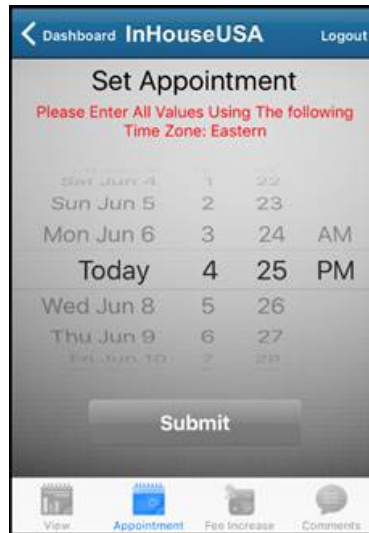

Clients will be able to cancel requests as they are provided with a Cancel button.

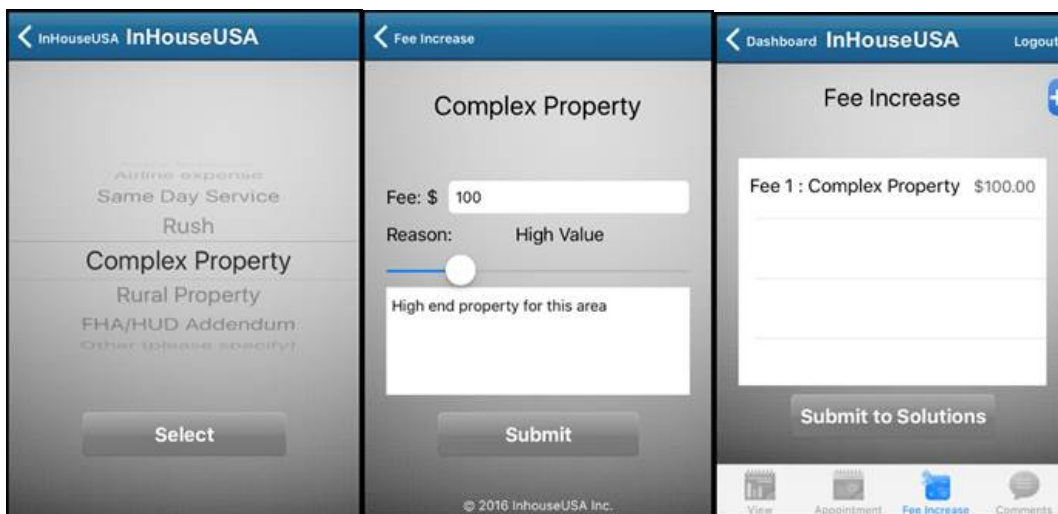

Appraisers will be able to set appointment times, so long as the appointment date that is set is greater than or equal to the current time. Appointments cannot be set retroactively and appointments will have to be set in Eastern Standard Time (EST).

Appraisers will be able to submit Fee Increases on the go. Up to 4 fee entries are allowed per fee increase submission. All comments that are submitted along with the fee increase will be visible in the Fee Filter upon submission. Fees may be deleted by sliding the fee to the left.

Please help increase our brand awareness for our Mobile app through all phone conversations and email correspondences. Upon mention, please track your requests by using the status code AA01-0, AA02-0 and AA03-0 located in the Comments section so your efforts are acknowledged. The top 3 employees with the highest number of downloads per month will be rewarded with a bonus prize! By providing greater convenience and connectivity to all Clients and Appraisers, while reducing

the need to juggle incoming phone calls, we expect productivity to increase and response times to decrease with the release of this Mobile App.

The Mobile App can be downloaded or updated in the AppStore and PlayStore by searching...

Only available on Apple and Android systems. Blackberry OS are not supported.

InHouseUSA has been providing innovative valuation solutions throughout the US since 2002. As early adopters of requirements under the Dodd-Frank Act, **InHouseUSA** ensures compliance throughout the entire valuation process, from request to UCDP approval. **InHouseUSA** offers two unique products; **Connexions and Solutions**. Both platforms are fully customizable and allow integration of lenders' business rules, which helps standardize practices and policies throughout the valuation life cycle.

Connexions: A Residential and Commercial Appraisal Management System (AMS) that allows lenders to take full control of their regulatory compliance requirements "InHouse". Connexions can also manage your panel of AMC's, with the ability to consistently rate their performance. **Solutions:** An Appraisal Management Company (AMC) that offers a full complement of tools and "solutions" to efficiently reduce costs and Turn Times for lenders, mortgage brokers and appraisers
